

## APPLICATION OF REMOTE SENSING AND GIS

**Paper Code: ETEN-405**

**Paper: Application of Remote Sensing and GIS**

<b>L</b>	<b>T/P</b>	<b>C</b>
<b>3</b>	<b>0</b>	<b>3</b>

### **INSTRUCTIONS TO PAPER SETTERS:**

**MAXIMUM MARKS: 75**

1. Question No. 1 should be compulsory and cover the entire syllabus. This question should have objective or short answer type questions. It should be of 25 marks.
2. Apart from Question No. 1, rest of the paper shall consist of four units as per the syllabus. Every unit should have two questions. However, student may be asked to attempt only 1 question from each unit. Each question should be 12.5 marks.

*Objective:*

1. *Understand the principles of remote sensing and digital image processing;*
2. *Understand the principles of Geographic Information Systems (GIS);*
3. *Gain experience in the applications of remote sensing and GIS for environmental engineering such as assessment of cyclone, rainfall, atmospheric humidity etc.*
4. *Gain experience in the use of image processing and GIS software.*

### **UNIT I**

Introduction, concepts and physical basis of Remote Sensing, Electromagnetic spectrum, radiation laws, atmospheric effects, image characteristics.

Remote sensing systems; sources of remote sensing information, spectral quantities spectral signatures and characteristics spectral reflectance curves for rocks, soil, vegetation and water.

Introduction to Aerial and space borne platforms.

Global positioning system (GPS) photogrammetry – analog, analytical and digital photogrammetry, height and plan metric.

**[T1, T2][No. of Hours: 11]**

### **UNIT II**

Optical, thermal and microwave sensors and their resolution, salient features of some of operating Remote Sensing satellites,

Digital image processing; introduction, image rectification and restoration, image enhancement, manipulation, image classification, fusion.

**[T1, T2][No. of Hours: 11]**

### **UNIT III**

GIS system : Definition terminology and data types, Map projection and Co-ordinate system, basic components of GIS software, data models, data acquisition, both raster based and vector based data input and data processing and management including topology, overlaying and integration and finally data product and report generation, principle of cartography and cartographic design.

GIS customization concepts, approaches of Multi-criteria decision making, concepts and applications of Geostatistics.

**[T1, T2][No. of Hours: 11]**

### **UNIT IV**

Application of Geo-spatial technology in Environmental Management,, assessment of cyclones, rainfall, atmospheric humidity etc., weather analysis, forecasting and modelling. Land use, inventory and monitoring, forestry, urban planning, snow and glaciers, coastal zone management, pollution-land, air, and water, sustainable development, climate change, commercially available remote sensing and GIS software.

**[T1, T2][No. of Hours: 12]**

### **Text Books:**

- [T1] Chang K.T., "Introduction to Geographic Information System", Tata McGraw Hill Education (P) Ltd.,  
[T2] Joseph G., "Fundamentals of Remote Sensing", University Press (India) Ltd., Hyderabad.
